## DEAN ST. Studio 2

Studio 2 is a unique space within Dean Street – tucked around the rear of the building, it offers seclusion from the busier parts of the building, in addition to a host of possibilities for recording and mixing.

Originally a large and high-ceilinged space for drum tracking, the modern studio construction takes full advantage of the preceding room's acoustics to offer Dean St's most characterful live space; all this

attached to an intimate and warm sounding control room – featuring the engineer’s choice of either Pro Tools HDX rig, or 24 input UAD system. The studio is also packed with industry-standard outboard and backline choices, ideal for seamless production sessions, writing, and vocal tracking – with the scope afforded by the characterful booth for guitar, or even solo string overdubs.

In recent years, Studio 2 has been home to post-production company Yellow Boat Music, and the firm’s influence on the rooms is clear: the space is model for tracking to picture, with dual video screens in the booth and control room, and a precise and even control room acoustic – even featuring a Trinnov unit for exacting calibration of the ADAM and NS10 monitoring when required.

## EQUIPMENT LIST

### DAW

- Apple Mac Mini (2020)
- Avid MAGMA Expansion Chassis
- Avid Pro Tools HDX (x1)
- Universal Audio Apollo Twin Gen 1
- Apogee Symphony
- Universal Audio PCIe DSP Octo

### MONITORING

- Trinnov ST-2 Pro
- ADAM A77X
- Avantone Mixcube
- Rane HA6s Headphone Mixer
- Beyerdynamic DT100, 150s

### MIC PREAMPS AND EQUALISERS

- Neve 1073DPX
- Wunder Audio PA Four
- Electronaut M63 2-Channel Valve Preamp

### COMPRESSORS

- Empirical Labs Distressor EL-8

### MICROPHONES

- Neumann U87ai (x2)
- Studio 1 Mics available on request

### PLUG-INS

- UAD Complete Bundle
- Plugin Alliance MEGA Bundle
- Antares Auto-Tune Pro
- Soundtoys 5
- iZotope 8 (Ozone, Rx)
- FabFilter Total Bundle
- Celemony Melodyne
- All AVID Plug-Ins
